**BALTIMORE SCHOOLS RECEIVE DONATION FROM HAREBRAIN, INC.
AND PROGRESSUS THERAPY**

Schools will receive 1,500 WhisperPhones

December 27, 2006 (Minneapolis)—Minnesota-based Harebrain Inc. has partnered with Progressus Therapy to provide Baltimore city schools with an educational tool to increase literacy and reading test scores. 1,500 WhisperPhones were donated to the schools at a value of \$15,000.

Progressus Therapy works closely with Baltimore City Public School District on a language-based reading intervention program at West Baltimore Middle School. The makers of WhisperPhone felt this was an opportune time to partner to help these students improve speech-language and reading skills.

“WhisperPhone helps students self-monitor in a busy classroom or library. We all learned to read by sounding it out and with WhisperPhone a whole classroom can effectively sound out words at the same time,” said Jean Blosser, vice president of therapy programs and quality.

Research by the National Reading Panel (2000) also supports the use of acoustic self-amplification, such as WhisperPhone.

“Using our product helps learners hear the sounds that make up words (phonemes) much better. Knowing that our product has been shown to increase literacy and better reading test results is so rewarding; this is why we do our job,” said Steve Swain of Harebrain, Inc.

Progressus Therapy is a subsidiary of Catapult Learning, a company owned by Baltimore-based Educate, Inc. (NASDAQ: EEEE). Other companies owned by Educate, Inc. include Sylvan Learning Centers, Hooked on Phonics and Education Station. Progressus Therapy recruits and places highly trained speech language professionals, occupational therapists and physical therapists in public and non-public schools, community-based clinics, early intervention programs and state agencies. For more information, visit www.ProgressusTherapy.com.

WhisperPhone, an educational tool for children and adults, is available for purchase through education suppliers, specialty catalogs, school product retailers and www.whisperphone.com. WhisperPhone is an educational tool designed to improve reading scores and meet the standards of No Child Left Behind. Phonemic awareness is a key predictor of literacy success, according to the National Reading Panel. It is hands-free, reversible, lightweight and dishwasher safe. No batteries are required. It is made in the United States by Harebrain, Inc. For more information, visit www.WhisperPhone.com
