WHISPERPHONE® FEATURED IN *AUDITORY PROCESSING DISORDERS* BOOK

Product named an effective tool to use in therapy

May 29, 2007 (MINNEAPOLIS)—WhisperPhone by Harebrain, Inc. is featured as a valuable acoustic self-amplification tool in the book *Auditory Processing Disorders: Assessment, Management and Treatment* edited by Donna Geffner, Ph.D., CCC-SLP/A and Debra Ross-Swain, Ed.D., CCC-SLP. The book explains the detailed history, definition and treatments of auditory processing disorders.

Auditory Processing Disorders is published by Plural Publishing and was released in April 2007. It serves as a compilation of resources with input from over 25 experts.

“We are honored that WhisperPhone is recommended in *Auditory Processing Disorders*. We believe this tool is ideal for a variety of settings including home, classroom and therapy. It’s motivating to know that others are reaching the same conclusion,” said Jeff Waffensmith, vice president of product development, Harebrain, Inc.

“Rarely does a resource this valuable come along. As a company dedicated to the success of speech and language pathologists nationwide, Progressus applauds the authoring team—well done,” said Jean Blosser, Ed.D., CCC-SLP vice president, therapy programs and quality at Progressus Therapy.

“Acoustic self-amplification is an effective, affordable and portable tool for treatment of auditory processing deficits, particularly phoneme and prosody training for children and adults in the therapy setting,” wrote Theresha Boomgarden-Szypulski, CCC-SLP(Chapter 22, Page 452).

WhisperPhone by Harebrain Inc. is available for purchase through education suppliers, specialty catalogs, school product retailers and www.whisperphone.com. WhisperPhone is an educational tool designed to improve reading scores and meet the standards of No Child Left Behind. This hands-free, acoustical voice-feedback headset helps learners hear phonemes, the sounds that compose words, more clearly. Phonemic awareness is a key predictor of literacy success, according to the National Reading Panel. It is hands-free, reversible, lightweight and dishwasher safe. No batteries are required. It is made in the United States by Harebrain, Inc. For more information about WhisperPhone, please visit www.WhisperPhone.com.
